## BRS (Booking Reservation System)

BRS is used to manage all tee bookings and reservations on the golf course. The tee sheet is populated with competition dates and times by the office when the plans for the new year are put in place, normally October, November and December.

Individual members can book both competition and casual play tee times via this software. The Club operates a 6-days in advance booking system for members with any available slots then being opened up to visitors 3 days in advance.

## ClubV1

ClubV1 is used by the club to record all membership details for maintaining records of your subscriptions/payments, your bar card transactions via the till as well as competition entries when used. This system is also used to run and manage all competitions from set-up through to production of the results. There are also a number of administration functions within the system which the Club uses for preparing and sending out membership bills as well as communication to members via email.

All the data is held in the 'Cloud' and access is via the web – members can access their personal data either through the Web or via the mobile app as detailed above.

## HowDidDo

HowDidDo is an addition to ClubV1 and provides a personal record of all competitions that a member has played in as well as allowing members to directly input competition scores.
