

Hi All,

This **week's/month's** newsletter focuses on one of our favourite suppliers in the shop.

Motocaddy are renowned for offering top-quality products packed with technology, and have just launched their latest 2024 product line-up, including the brand **new compact-folding M-Series** with cable-free battery and automotive-inspired styling, plus a revolutionary **new entry-level electric trolley** retailing for under **£500!**

GREAT VALUE FEATURES

The brand-new **SE electric trolley** offers customary Motocaddy styling, performance, quality, and reliability with a great range of features including:

- Nine-speed settings to match your perfect walking pace
- *QUIKFOLD* mechanism allowing assembly in seconds
- USB charging port to charge your tech while you play
- Quick-release wheels with new tyre tread
- Whisper-quiet 200W motor offering plenty of power
- Extended Lithium and 18 hole Lead-acid battery options

The best part is that the trolley is available from the shop for only £499.99, making it easier for more golfers to #GOELECTRIC this season!

This trolley is causing quite a stir, so pop into the shop or drop us a message if you want to learn more or place your order today!

SIMPLE COMPACT-FOLDING

Motocaddy have been busy, and have also launched **seven new trolleys** within their best-selling **M-Series** compact-folding range with some great new features for 2024, including:

- **NEW** Automotive-inspired styling
- **NEW** *CLICK 'N' CONNECT*[®] cable-free battery
- **NEW** Low-profile wheels with high-performance tyre tread
- **NEW** Ergonomic handle grips
- **NEW** Retractable rear anti-tip wheel (optional extra)

Packed with features, the M-Series is powered by a next-generation 28.8V system, making them twice as powerful as traditional trolleys, with whisper-quiet 230W motors and USB charging ports as standard. They also offer a height adjustable handle, inverting wheels to fit into the smallest spaces, and a really simple folding system – **pop into the shop for a demo if you don't believe us!**

In total, the Motocaddy **M-Series** consists of nine different models, ranging from the easy-to-use **M1**, all the way up to the luxury **M-TECH GPS**, plus the popular **M7 REMOTE** and high-tech **M7 GPS REMOTE** launched last year.

We love Motocaddy's **DHC** (Downhill Control) technology, which is available as either an optional upgrade or as standard on certain models, plus their **EASILOCK**[®] bag-to-trolley connection system which makes attaching your bag a breeze.

As you can see, there's plenty of choice available in this year's new Motocaddy range, so if you're looking for a new trolley this season, pop into the shop for a demo and to find out more!
