

The Complete Club Management System

Cloud based membership, marketing, competition and handicapping administration

Overview

In 2005 Club Systems introduced a fully integrated EPoS loyalty system and as clubs realised the marketing potential of the internet, Club Systems delivered CSiSites, a fully customisable and personalised website with content automatically uploaded from other modules. Using over 30 years of development expertise and customer feedback, combined with cutting edge cloud technology, we have now developed ClubV1. Compatible with all modern operating systems, including those powering mobile, tablet, PC and Macs, ClubV1 will allow club officials to administer membership, handicaps and manage all aspects of a golf club wherever there is an internet connection.

The 4th Generation

- Fully Hosted Cloud Based System usable anywhere on most internet enabled devices
- The highest level of SSL certification, protecting and securing your member's data
- Full member database, storing customisable fields, including CONGU® handicaps
- One database for Men's & Ladies handicapping, Membership, EPoS and Marketing
- CONGU® compliant handicap record storing members' playing history
- Members' subscription and financial control - raise annual and periodic bills, track payments and link with online payment systems such as BACS and HowDoiPay
- Detailed reports and analysis, standard membership and handicap reports and an easy to use list generator
- Email Marketing - create members newsletters, track delivery success and individual click throughs
- Competition Management of CONGU® qualifying individual events, non-qualifying and team management including medal, stableford, betterball, foursomes etc.
- User Account Control
- Integration with CSI EPoS, PSiTouch, CSiSites, Booking systems & Access Control
